DETAILED ACTION

1. This office action is in response to the amendment filed on 02/28/05.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 98-109 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. (US 5,168,509) (hereafter Nakamura).

Regarding claims 98, 100, Nakamura discloses the claimed subject matter "a modulator operable to modulate ... integer" in Fig.3, elements 11, 14; "a transmitter ... demodulated data stream" in Fig. 3, element 15. Nakamura differs from the claimed invention in that Nakamura doesn't teach "wherein the modulator is capable of changing the value of n". However, since the "level" of the modulation is selective, (col. 1, lines 34-35) it would have been obvious to one skilled in the art that some kind of mechanism, as a design choice, would be utilized of such selection.

Regarding claims 99, 101, the claimed subject matter "wherein ... condition" would have been optional.

Regarding claims 102-109, see claims 98-99, collectively.
